

Dear My Powell;

This is incredible that we have a product that is now being trampled on by individuals who are not quick enough or agile enough when someone comes up with technology and innovation that actually helps the consumer and marketplace. Instead of joining in and trying to see how they can duplicate this idea, they attack it. This seems to be the Satellite TV/Local channel issue all over again. This truly a shame when the Congress and FCC should be looking out for the public's interests as a whole and be protecting us from terrorists. Over the airwaves content such as this HELPFUL service is just misplaced resources and a waste of the publics tax dollars.

Thank you

tom boyle
